PRIME | Transition Task Force | Final Report 2026 | September 23rd 2026

ENIM Coordination Group

Strengthening strategic coordination and preparation for ENIM Plenary decisions

Key Role

- Prepare Plenary decisions at Infrastructure Manager level, including internal consultation
- Ensure continuity between ENIM meetings
- Propose development and update of the ENIM Work Programme
- Support the Plenary in strategic monitoring NC deliverables regarding quality, clarity, consistency and strategic alignment
- Prepare proposals for updates to the NC Appointment Document and ENIM RoP, if required

Governance Principles

- Full transparency and involvement of all Infrastructure Managers
- Lean structure with clear responsibilities
- No decision-making power — all formal decisions remain with the ENIM Plenary
- No pre-decision or commitment of Chair, Vice-Chair or Plenary
- Open participation: one representative and one alternate per Infrastructure Manager
